DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 7-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Katoh et al. (5,554,000). Katoh et al. discloses a transonic blade for use in a blade cascade of an axial-flow compressor including a large number of blades 4, each having an intrados and an extrados disposed in an annular fluid passage. Katoh et al. further disclose the Mach number of the blade cascade being between .8 and 1.1. The language used in the wherein statements of claims 1-3 and 10-13 is functional language. There appears to be no structural difference between the airfoil of Applicant, as claimed, and Katoh et al., the airfoil of Katoh et al. would inherently be capable of performing the claimed function and at a turning angle as claimed.

CONCLUSION

Allowable Subject Matter

Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
